

Amendments to the Claims:

This listing of the claims will replace all prior versions, and listings of claims in the application.

Listings of Claims:

1. (Currently Amended) A manual input device comprising:
a joystick type knob, and
a rotary knob that is ~~are~~ disposed coaxially with the joystick type knob,
a first actuator to load an external force on the joystick type knob,
a second actuator to load an external force on the rotary knob,
a first detector to detect an operation state of the joystick type knob, and
a second detector to detect an operation state of the rotary knob.

2. (Previously Amended) The manual input device according to claim 1,
further comprising a guide member to define an operation direction of the
joystick type knob.

3. (Previously Amended) The manual input device according to claim 1,
further comprising a control unit that controls the first actuator based on a
signal supplied from the first detector and controls the second actuator based
on a signal supplied from the second detector, the control unit provided in a box
that houses the manual input device.

4. (Previously Amended) The manual input device according to claim 1,
further comprising a control unit that controls the first actuator based on a
signal supplied from the first detector and controls the second actuator based
on a signal supplied from the second detector, the control unit provided in an
external apparatus.

5. (Currently Amended) An onboard instrument control device comprising:

electric instrument selection switches to select an electric instrument having a function to be controlled; and

B¹
a manual input device to control various functions of the electric instrument selected by use of one of the selection switches, the manual input device comprising a joystick type knob, ~~and a rotary knob that is~~ are disposed coaxially with the rotary knob, a first actuator to load an external force on the joystick type knob, a second actuator to load an external force on the rotary knob, a first detector to detect an operation state of the joystick type knob, and second detector to detect an operation state of the rotary knob.
